

CAREER SUMMARY

Detail-oriented Data Analyst with hands-on experience in SQL, Python, EDA, and statistical modelling. Has worked across data quality, anomaly detection, and business reporting - processing and auditing 1,000+ datasets across two consecutive analytical roles. Strong foundations in both descriptive and predictive analytics, with project experience in linear and logistic regression. Holds an MCA from KIIT University and a Microsoft-certified credential in data analysis. Looking to contribute analytical rigor and data storytelling skills to a data-driven organization.

EDUCATION

- MASTER IN COMPUTER APPLICATIONS | KIIT University, Bhubaneswar Sept 2022 – May 2024
- BACHELOR OF COMPUTER APPLICATIONS | Utkal University, Bhubaneswar Aug 2021 – Dec 2021

PROFESSIONAL EXPERIENCE

DATA ANALYST | Landmine Soft | Hyderabad, IN Feb 2024 - Present

- Own end-to-end analytical workflows — from data extraction via SQL to stakeholder-ready reports - enabling data-driven decisions across business units.
- Designed and deployed GenAI-powered automation pipelines that reduced manual reporting time and improved team throughput.
- Maintained high data integrity across production datasets through systematic cleaning, validation, and anomaly detection protocols.
- Conducted exploratory data analysis to surface actionable insights; translated findings into visual reports consumed by non-technical stakeholders.

AI CONTRIBUTOR | Outlier AI | Freelance | Remote, California, US Oct 2024 - May 2025

- Evaluated 500+ AI-generated datasets for quality, coherence, and factual accuracy — directly improving LLM training signal through structured RLHF and SFT feedback loops.
- Delivered written analysis reports with prioritized recommendations that contributed to measurable improvements in model accuracy and output consistency.
- Designed multi-format prompts for GPT, Claude, and Gemini to stress-test model responses across edge cases, supporting systematic performance benchmarking.

DATA SCIENCE INTERN | Code Clause | Remote Nov 2023 – Dec 2023

- Independently scoped and delivered a full ML project within one month — from raw data ingestion and EDA through feature engineering, logistic regression modelling, and final evaluation.
- Improved model performance through systematic preprocessing and hyperparameter tuning, demonstrating hands-on experience with the ML experimentation loop.

PROJECTS

CRIME SCENE ANALYSIS IN INDIA | [Github](#)

- Applied correlation analysis and statistical hypothesis testing to examine relationships among different crime categories.
- Built a linear regression model to analyze the impact of crime variables on murder rates, achieving an R² score of ~0.78.

AI-ASSISTED PORTFOLIO WEBSITE | [Github](#) | [Live](#)

- Built a responsive portfolio website using AI-assisted development (Vibe Coding).
- Automated contact workflow using Google Forms, Google Sheets, and email notifications.

SKILLS

Data Analysis & Engineering: SQL, Python, Pandas, NumPy, Data Cleaning, EDA, Data Quality Auditing, Anomaly Detection
Visualization & Reporting: Matplotlib, Excel, Statistical Reporting, Insight Communication
AI & Evaluation: RLHF, SFT, LLM Evaluation, Data Annotation, Prompt Engineering, GenAI Workflow Automation
Tools & Environment: Jupyter Notebook, GitHub, Google Sheets, Google Forms, ChatGPT, Claude, Gemini

CERTIFICATIONS

CAREER ESSENTIALS IN DATA ANALYSIS | Microsoft by LinkedIn Learning | [Credentials](#)

- Developed foundational skills in data cleaning, data visualization, and analytics using Excel and Python
